WASIUR RAHMAN SAKIB

SOFTWARE ENGINEER · FULL-STACK & SYSTEMS ARCHITECTURE

📍 Dhaka, Bangladesh ✉ wasisakib7846@gmail.com 🌐 wasi-747.vercel.app 🐥 github.com/wasi-747

💼 linkedin.com/in/wasiur-rahman-sakib

PROFESSIONAL SUMMARY

Results-driven Software Engineer with proven industry experience architecting scalable distributed systems, real-time telemetry pipelines, and AI-integrated applications. Promoted from Software Engineer Intern to full-time **Junior Software Engineer** at TechDojo Limited within 3 months. Strong algorithmic foundation in data structures, system design, low-latency API engineering, and automated testing. Adept at delivering robust production-grade solutions across complex full-stack ecosystems.

TECHNICAL SKILLS

Programming Languages: C++, Python, TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3
Core CS & Algorithms: Data Structures & Algorithms (Graphs, Trees, DP), OOP, Multi-threading & Concurrency, OS & Networks
Backend & Distributed: Node.js, Express, FastAPI, RESTful APIs, WebSockets (Socket.IO), Redis, Microservices Architecture
Frontend & UI: React, Next.js, Framer Motion, GSAP, Tailwind CSS v4, Responsive Architecture
Databases & Caching: MongoDB (Mongoose), PostgreSQL, Redis, Firebase (Firestore, Auth)
Tools, DevOps & AI: Git, GitHub Actions, Linux, Docker, Postman, Vercel, LLM Intent Routing, Sentence Transformers

PROFESSIONAL EXPERIENCE

TechDojo Limited — Dhaka, Bangladesh

Junior Software Engineer (Full-Time) — Nov 2026 – Present

- Promoted to full-time Junior Software Engineer following high-velocity delivery and architectural contributions during internship.
- Spearheading backend service design, standardizing RESTful API contracts, and optimizing database queries for high concurrency.
- Building asynchronous event processing pipelines and modular microservices with Node.js and TypeScript.
- Implementing automated integration testing with CI/CD quality gates, reducing production regression risks by 35%.

Software Engineer Intern — Aug 2026 – Oct 2026

- Engineered a full-stack AI-driven conversational e-commerce engine with semantic product recommendation and dynamic checkout.
- Designed intelligent LLM prompt routing and query caching layer, decreasing latency and improving customer support efficiency by 40%.
- Integrated React frontend with Node.js/MongoDB services, maintaining rigorous validation schemas and reliable data pipelines.

Independent Contracting / Freelance — Remote

Full-Stack Software Engineer — 2024 – 2026

- Architected *trustfund-core*, a secure fintech P2P platform utilizing MERN stack with strict Role-Based Access Controls (RBAC).
- Implemented ACID-compliant double-entry ledger structures to enforce financial data integrity with a 100% auditable record trail.
- Developed *Sol Mintx*, a decentralized Web3 token portal integrating Solana wallet adapters and SPL token workflows.

KEY PROJECTS & SYSTEM ENGINEERING

LifeOS Household — *IoT Telemetry & Real-Time Monitoring* — GitHub

- Engineered a lightweight background Python telemetry agent that captures system vitals (CPU, RAM, process threads) and streams metrics in real time via WebSockets (Socket.IO).
- Developed a high-throughput Express/MongoDB ingestion server and interactive React dashboard featuring real-time device health and audit logs.

NeuroLink — *Graph-Based AI Cognitive Architecture* — GitHub

- Developed a FastAPI back-end utilizing `all-MiniLM-L6-v2` embedding pipelines for semantic similarity matching of unstructured text.
- Implemented Depth-First Search (DFS) graph traversal algorithms across NetworkX directed knowledge graphs to generate adaptive learning paths.

RideShare — *Real-Time Geolocation Transit Engine* — GitHub

- Built a transit web application with real-time GPS coordinate streaming and route computation over WebSockets and Mapbox API.
- Optimized database connection pooling in serverless environments via persistent `global._mongooseCache`, eliminating connection spikes.

EDUCATION

United International University (UIU) — B.Sc. in Computer Science & Engineering — 2022 – 2026, Dhaka, Bangladesh

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems (DBMS), Computer Networks, System Design.
