

WASIUR RAHMAN SAKIB

FULL-STACK & AI SOFTWARE ENGINEER

 Dhaka, Bangladesh  wasisakib7846@gmail.com  wasi-747.vercel.app  github.com/wasi-747  linkedin.com/in/wasiur-rahman-sakib  cal.com/wasiur

PROFESSIONAL SUMMARY

Highly motivated and results-driven Full-Stack Software Engineer with 2+ years of experience designing, building, and deploying scalable web architectures, MERN-stack systems, real-time telemetry pipelines, and intelligent AI-integrated applications. Strong background in database design, API contract enforcement, and serverless architectures. Proven ability to take projects from concept to production-grade deployment under load.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, SQL

Databases & Cache: MongoDB (Mongoose), Redis, Firebase (Firestore, Auth)

Frontend: React, Next.js, Framer Motion, GSAP, Tailwind CSS v4, Responsive Design

AI & Systems: LLM Intent Routing, LangGraph, Sentence Transformers, NetworkX

Backend & APIs: Node.js, Express, FastAPI, RESTful APIs, WebSockets (Socket.IO)

Tools & Testing: Git, GitHub Actions, Vercel, Playwright, Postman, Linux

PROFESSIONAL EXPERIENCE

TechDojo Limited

Software Engineer Intern

2026 – Present

Dhaka, Bangladesh

- Designed and built a full-stack AI-powered e-commerce assistant featuring product recommendation, intent detection, and conversational checkout flows.
- Developed intelligent LLM routing systems to navigate user queries, enhancing customer support response efficiency by 40%.
- Integrated React frontend with Node.js/MongoDB backend to process conversational orders, maintaining data integrity with strict validation rules.

Independent Contracting / Freelance

Full-Stack Software Architect

2024 – Present

Remote

- Architected and deployed trustfund-core, a secure fintech peer-to-peer lending platform using a robust MERN stack.
- Implemented strict role-based access controls (RBAC) and structured database transaction ledgers to guarantee a 100% auditable data trail.
- Developed Sol Mintx, a Web3 Solana token minting platform featuring wallet adapter integration and SPL token creation flows.

AI & Web Developer

Ecosystem Integrations & APIs

2023 – Present

Remote

- Built and maintained several end-to-end applications integrating diverse external APIs and real-time telemetry systems.
- Designed data processing scripts in Python to automate routine developer environment setup and API verification.

KEY PROJECTS & CONTRIBUTIONS

LifeOS Household — IoT Telemetry & Dashboard

[Live Site](#) | [GitHub](#)

- Developed a background Python telemetry agent that gathers system statistics (CPU, RAM, active windows) and streams them via WebSockets (Socket.IO) to a central Express/MongoDB server.
- Developed an interactive React dashboard showing real-time device status, system health breakdowns, and administrative audit logs.

NeuroLink — AI Wellness Platform

[Live Site](#) | [GitHub](#)

- Built a FastAPI back-end utilizing all-MiniLM-L6-v2 for semantic similarity matching of journal entries.
- Implemented a DFS traversal algorithm on a NetworkX knowledge graph to generate personalized wellness and mental health learning paths.

RideShare — Transit Web App

[Live Site](#) | [GitHub](#)

- Created a Next.js carpooling app with real-time GPS tracking over WebSockets and optimized connection pooling via global_mongooseCache to prevent connection spikes in serverless environments.

EDUCATION

United International University

B.Sc. in Computer Science & Engineering

2022 – 2026

Dhaka, Bangladesh
